WORK EXPERIENCE

Full-stack Web Developer
Sightcall
04/2022 - 06/2024   *Boulogne-Billancourt, France*
2 years and 3 months

- Developed and tested new features to enhance the company's SaaS solutions, a digital process automation app and a video conferencing platform
- Worked in a Test-Driven Development (TDD) environment; created APIs and their corresponding frontends
- Engaged in backporting and refactoring legacy code to improve performance and maintainability
- Integrated third-party services like Sharepoint and Google Drive
- Participated in an Agile setup with bi-weekly sprints and several major releases annually
- Frontend stack: **Ember.js**, **React.js**, **Bootstrap**, **Jest**, **XState**
- Backend stack: **Ruby on Rails, Sidekiq**, **RSpec**, **JSONAPI-Resources**
- Databases and others: **Bash**, **MariaDB**, **Redis**, **ElasticSearch**, **Docker**, **Kibana**, **Sentry**, **Jenkins**, **Gitlab CI/CD**

React Frontend Developer
MBN-TECH
10/2021 - 04/2022   *Bucharest, Romania*
6 months

- Worked on the development of one of the client's decentralised application, a multi-blockchain platform
- Learnt about blockchain technology and smart contract interaction through **web3.js**, as well as about concepts of the decentralised finance world such as token creation, staking and yield farming
- Stack used: **TypeScript**, **React.js**, **Material-UI**, **Next.js**, **Node.js**, **Solidity**

Customer Excellence Suport Analyst
VTEX
11/2020 - 08/2021   *Bucharest, Romania*
9 months

- Supported our partners to develop websites for our clients using the company's web framework
- Discussed with clients and partners to address their business requirements and technical questions
- Oversaw project management, SEO optimization, debugging and bug fixing
- Stack used: **HTML**, **CSS**, **JavaScript, React**, **GraphQL**, **VTEX IO**

Junior Data Scientist
GfK
10/2018 - 11/2020   *Bucharest, Romania*
2 years and 2 months

- Projects ranged from Test and Control studies (that measure advertisement effectiveness using geographic experiments) to more complex ones such as Marketing Mix Modelling studies (which help clients understand the impact of their advertising spend and forecast future marketing campaign performance)
- Developed and automated tasks using custom scripts; followed and modified pre-made scripts
- Collected and processed data; trained colleagues and wrote technical guides
- Stack used: **R**, **Python**, **SPSS**, **VBA**, **BASH**, **SQL**, **GfK StarTrack**
